Additional details on application support:

- All applications listed support direct dictation.
- Microsoft Office "Click-to-Run" is supported as long as the files are installed locally.
- Full Text Control allows you to use voice to perform direct dictation, selection, correction and cursor movement within text.
- Menu Tracking provides the ability to use voice to "click" an application's menus, buttons, dialogs boxes, etc.
- Natural Language Commands let you state your intent within a **specific** application instead of following the menu-selection and mouse steps of the Windows interface.
